

*Developing Scotland's Geospatial Community*

# Innovation & Collaboration Funding

---

Dr Ashley Stewart

28<sup>th</sup> September 2022

# Housekeeping

- Please turn off cameras and microphones
- Use chat box to briefly introduce your business, what you want to achieve from joining the event and the types of connections you'd like to make
- Please drop comments/questions into the chat box and one of the team will raise it with the speakers

# Agenda

10.30 – 10.40	Welcome - Location Data Scotland, Dr Ashley Stewart
<b>AVAILABLE SUPPORT &amp; PIPELINE OF FUNDING</b>	
10.40 – 10.55	Innovate UK, Carol Sutherland
10.55 – 11.10	European Space Agency, Ken Gordon
11.10 – 11.30	Scottish Enterprise – Funding Information & Support Service, Tracey Ward
<b>PREPARING A FUNDING APPLICATION</b>	
11.30 – 11.50	Panellists will share top 5 tips for preparing a funding application
11.50 – 12.00	Closing remarks

# Introduction

- Explore the innovation & collaboration funding opportunities available from Scotland, wider UK and international providers
- Receive guidance and support – top tips – on preparing an application and building a consortium of partners
- Networking - introduce yourself and your organisation in the chat box. Use this tool as a means to identify opportunities to collaborate, partners or simply connect

# Location Data Scotland

**Location Data Scotland is an inclusive geospatial community across Scotland, established to unlock the value in location data.**

We have been created to leverage location data as an enabler of innovation and to create greater efficiency in the products and services delivered and utilised by organisations and the public sector in Scotland.

<https://locationdatascotland.com>

# Aims of Location Data Scotland

- To establish an **inclusive** geospatial community across Scotland to **unlock the value** in location data.
- We will **connect, inform and facilitate collaboration** between industry, academia, public and third sector, across multiple sectors, to drive innovation, unlock skills and enable economic growth.

# Facilitating Connections & Collaboration

- *"We are really lucky to be working on such fascinating projects that are making huge impacts on sustainability. Having partners such as the European Space Agency, Location Data Scotland and the Geospatial Commission opens up a wealth of opportunities for SMEs in Scotland. Ashley at LDS has been a great advocate of our technology and ensures **she links us with key opportunities** where possible."* (Peter Young, CEO, GSI)
- *"Ashley at Location Data Scotland **has a fantastic network of connections** and she easily started **opening doors for us to the right people** across the location data domain."* (Arun Gopinath, CEO, Vahanomy)

# Scotland's Location Data Directory

# Scotland's Location Data Directory

**Scotland's Location Data  
Directory - Put Your  
Organisation on the Map**

Does your organisation use or supply location data in innovative ways to solve problems, improve services, enhance skills and/or refine customer experience?

Benefits of being listed:

- Find Customers
- Find Suppliers
- Collaborate with new Partners
- Find out about Funding Sources and Opportunities

**Get your organisation listed:**

<https://locationdatascotland.com/directory/>

# Scotland's Location Data Directory

# Facilitating Connections & Introductions

- Facilitated approx. 50 connections and introductions
  - Peer to Peer – introducing organisations to share best practice & explore collaborative opportunities
  - End User – connecting suppliers to potential end-users
  - Dataset Access – introducing data providers to organisations using data to develop products/services

*“LDS have been instrumental in helping us network into other industries and opened doors to potential collaborations in the agricultural sector”*

# Signposting

- UK-based funding: highlighting opportunities from UK agencies e.g., UK Space, CivTech, Scottish Enterprise
- European funding: Aerospace Valley, France: H2020 UFO Project funding opportunity & matchmaking event
- Support organisations: introductions to SE/SDI re inward investment & export assistance
- Support organisations: introduction to Innovation Centres to facilitate R&D
- Recruitment: shared vacancies and job opportunities

Developing Scotland's Geospatial Community

# Innovation and Collaboration Funding

28th September | 10:00 - 12:00 | Webinar

## Speakers

Carol Sunderland

Kenneth Gordon

Tracey Ward

# Supporting Geospatial Innovation

## Innovate UK

Carol Sunderland, Innovate UK

# Innovation

The process of taking new ideas and research to the marketplace.

The development of a new solution that:

- addresses a specific challenge
- results in a new product, process or service
- delivers value to the user
- generates a market

# The importance of innovation

Innovation:

- drives productivity, exports and economic growth
- helps solve society's challenges

# Innovate UK

- We are the UK's innovation agency
- We support business-led innovation in **all sectors, technologies and UK regions**
- We help convene, connect and enable collaboration
- We are a key delivery body of the Government's Innovation Strategy

# UK Research and Innovation

UK Research and Innovation brings together the 7 Research Councils, Innovate UK and Research England.

As part of UK Research and Innovation, Innovate UK drives productivity and economic growth by supporting businesses to develop and realise the potential of new ideas including those from the UK's world-class research base.

**UK Research  
and Innovation**

# Inspire

Make the opportunity  
visible and compelling

# Involve

Bring relevant organisations  
and people together

# Invest

Convene the resources  
needed, including our own

# Innovation specialists

## Innovate UK

- Funding and support for innovation projects

## Innovate UK KTN

- Connecting to new partners and opportunities

## Innovate UK Edge

- Growing your innovative business

## Catapult Network

- Specialist facilities & experts in technologies

# UK-wide presence

From funding and advisory services to facility and technology access, the Innovate UK group supports innovative businesses across every nation and region in the UK.

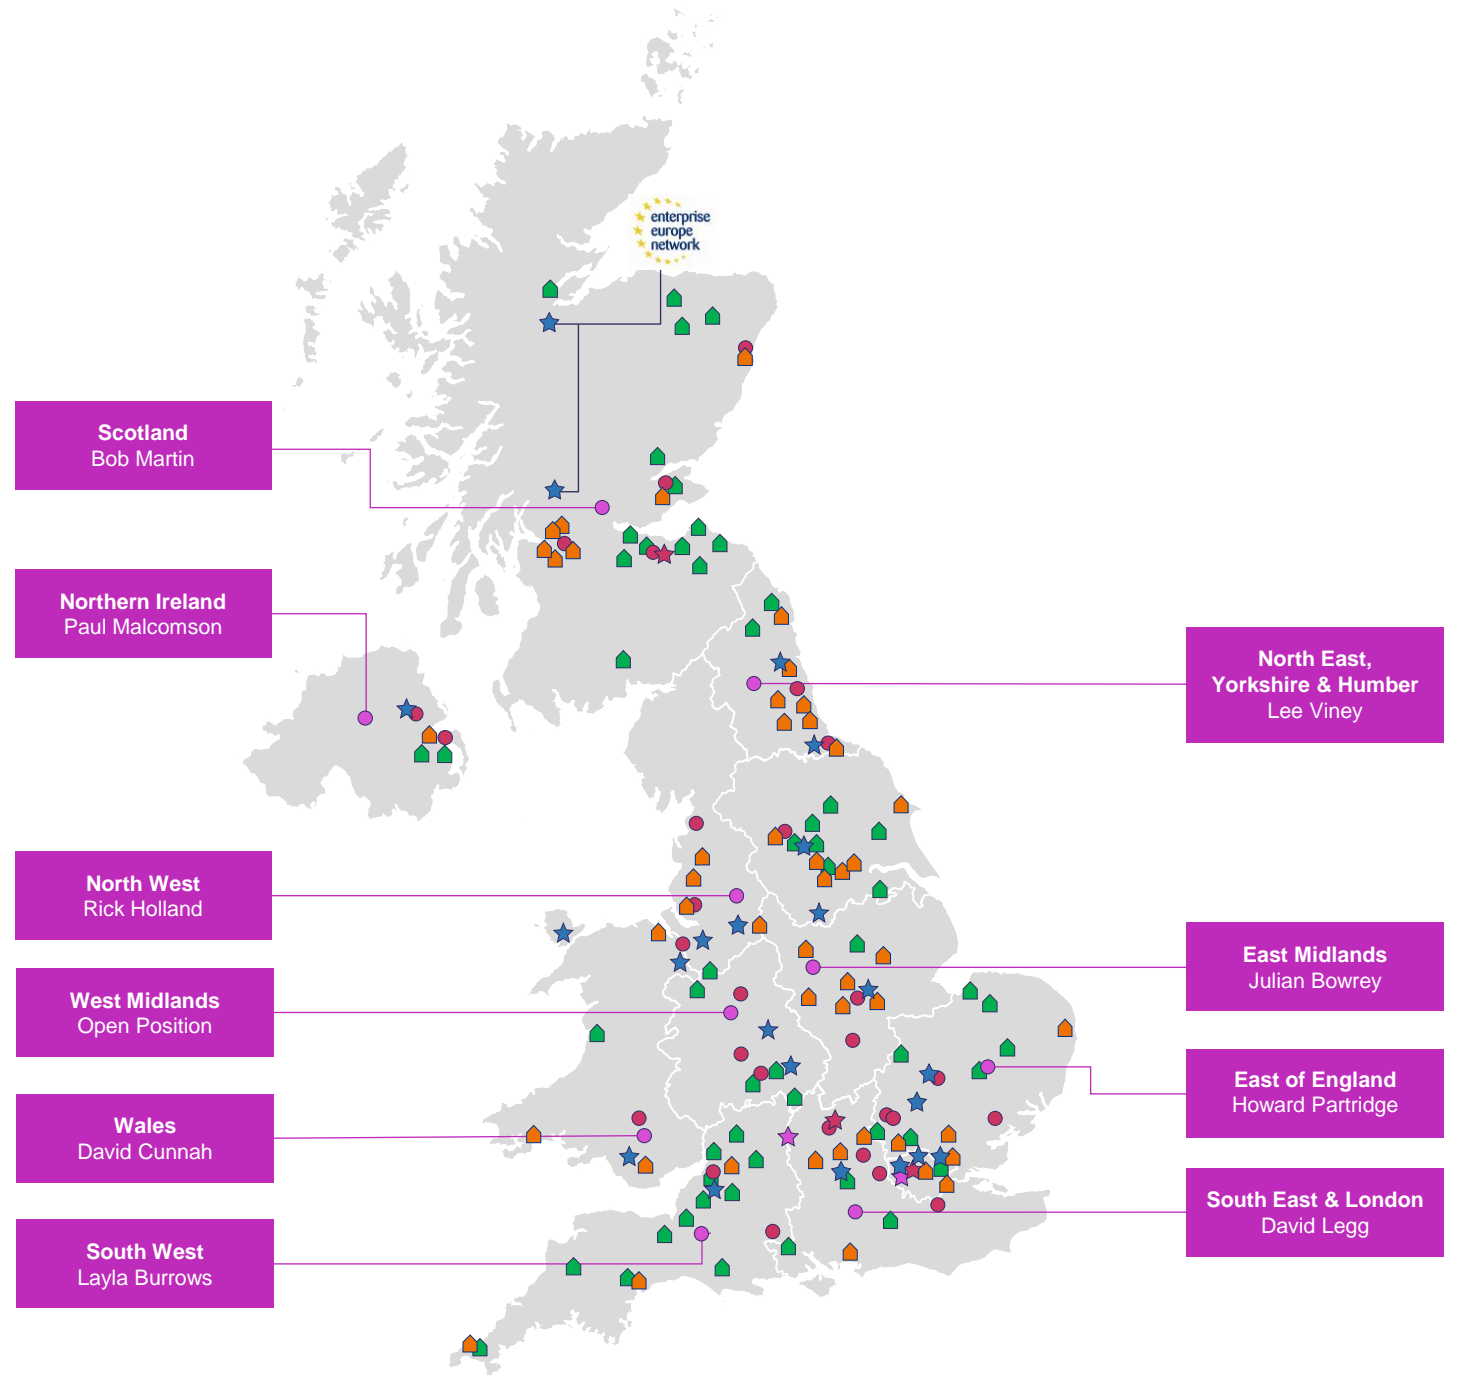

The geographical distribution of our staff and facilities ensures we engage place-based stakeholders and meet regional needs.

Innovate UK Funding  
per Business  
2007-2021

# Innovation Support Scotland

Total Innovate UK spend since 2007

Total Grant Value:

**£389,203,513**

Number of  
Participants:

**2,205**

Average  
Award:

**> £176K**

'Other' includes Catapults, Public Sector and Research technology Organisations.

# Supporting Geospatial Innovation

Geospatial innovation includes developments related to:

- geospatial data generation and / or
- geospatial data application

Innovation in geospatial solutions can benefit from funding and support in a range of:

- related technology areas\*
- application areas\*
- responsive\* and generic programmes

# Agriculture

Geospatial developments relating to agriculture can enable insights about crop and pasture growth, animal tracking, virtual fencing, autonomous tractors and more sustainable farming.

*Example development that received funding:*

Developments in advanced crop analytics using remote sensing imagery and sophisticated AI, led by Hummingbird Technologies. These help customers detect crop issues at an individual plant level and enable:

- earlier, more informed decision making
- targeted early-stage application of pesticide
- yield prediction
- verification of sustainable farming

# Maritime and Port Logistics

The digital revolution and geospatial innovation are enabling a cleaner, more efficient, agile and better regulated maritime industry, streamlined port operations and marine environment monitoring.

*Example development that received funding:*

Development of near real-time maritime situational intelligence through AI and Earth Observation data, led by SiriusInsight.AI.

This enables:

- risk management of vessel sanction breaches
- insurance risk visualisation and quantification
- automation of vessel monitoring

SiriusInsight.AI

# Construction and Infrastructure

Geospatial innovation is enabling cost savings, productivity gains, greater resilience and safety improvements in construction and infrastructure sectors.

## Earth-i Spectrum platform

*Example development that received funding:*

Development of a risk monitoring solution for construction and supply chain assets such as roads, rail, ports and pipelines, led by Earth-i. This involves AI driven analytics using data from remote sensing, including video, and terrestrial sources to provide change detection and risk alerts, on a global scale.

## This enables:

- reduction or prevention of costs from construction delays and asset failure
- monitoring efficiencies

# Rail

The need for precise and cost effective train positioning is stimulating positioning system developments.

*Example development that received funding:*

Development of a virtual transponder in a front-facing windscreen mounted camera and real-time image processing of video feed, led by Reliable Data Systems International.

This is intended to provide a train positioning approach that offers:

- track-precision
- lower costs, with a reduced need for expensive physical infrastructure

Reliable Data Systems International

# Covid-19 Response

Examples of short, fast start developments that were funded to help address the impact of Covid, at the start of the pandemic:

- Enhanced GPS positioning to improve location accuracy of consumer mobile devices
- Gate sensor data transmission to identify concentrated footfall in rural locations
- Remote monitoring of flood incidents for Environment Agency
- Mapping of local supply chain with health and social care needs
- Staff and contact tracking via location data and AI driven analytics

# Building the Future Economy

## Plan for action for UK business innovation

We have launched a [plan for action](#) to explain how we will deliver the [Government's UK Innovation Strategy](#), with the vision for the UK to become a global hub for innovation by 2035.

Our actions will be guided and prioritised by the following:

Strategic  
Themes

Future  
Economy

Growth  
at Scale

Global  
Opportunities

Innovation  
Ecosystem

Government  
Levers

Strong  
Foundations

Science &  
Research  
Strengths

Design  
Expertise

Societal Impact &  
Responsible  
Innovation

Innovation  
Talent & Skills

Equality  
Diversity &  
Inclusion

Place &  
Levelling Up

European Space Agency

# ESA SPACE SOLUTIONS

“In ESA Space Solutions our aim is to show that space is open for business and has the power to improve our everyday lives on Earth.”

## Programme Objectives

- **Promote** space applications and services to a wide range of customers, especially those who are not already aware of the benefits
- **Support** the development of new operational services for these customers
- Projects must make use of **at least one space asset** (such as satellite communications, earth observation of satellite navigation)
- **Support cross-fertilisation** with other disciplines

BUSINESS

## CURRENT FUNDING OPPORTUNITIES (1)

### Open Call (“Direct Negotiation”)

- Permanently open
  - 50% match funding
  - Feasibility Studies (cap at €250k, 9 months), Demonstration Projects (€Negotiable)
  - Any topic, any time
  - Zero-equity funding (from €60k to €2M+ per activity).
  - A personalised ESA consultant.
  - Technical & commercial guidance.
  - Access to our network of partners.
  - Credibility of the ESA brand.
- 
- Consult your UK Regional Ambassador Platform(s) for advice  
<https://business.esa.int/ambassador-platforms/ap-uk>

<https://business.esa.int>

## CURRENT FUNDING OPPORTUNITIES (2)

### **Currently Kickstart Activities supported in the UK**

<https://business.esa.int>

Kick-Start activities are funded at 75% by the European Space Agency for a maximum of €60K per contract.  
None are supported by the UK currently

### **Competitive Tenders (50% funded) – Feasibility Studies and Demonstration Projects**

#### **Closing THIS MONTH**

Space for Tourism

(Closes 30/09/2022)

Space and Digital Transformation for Green Energy Utilities

(Closes 30/09/2022)

NHS Future Hospitals Initiative

(Closes 30/09/2022)

Digital Supply Chain

(Closes 30/09/2022)

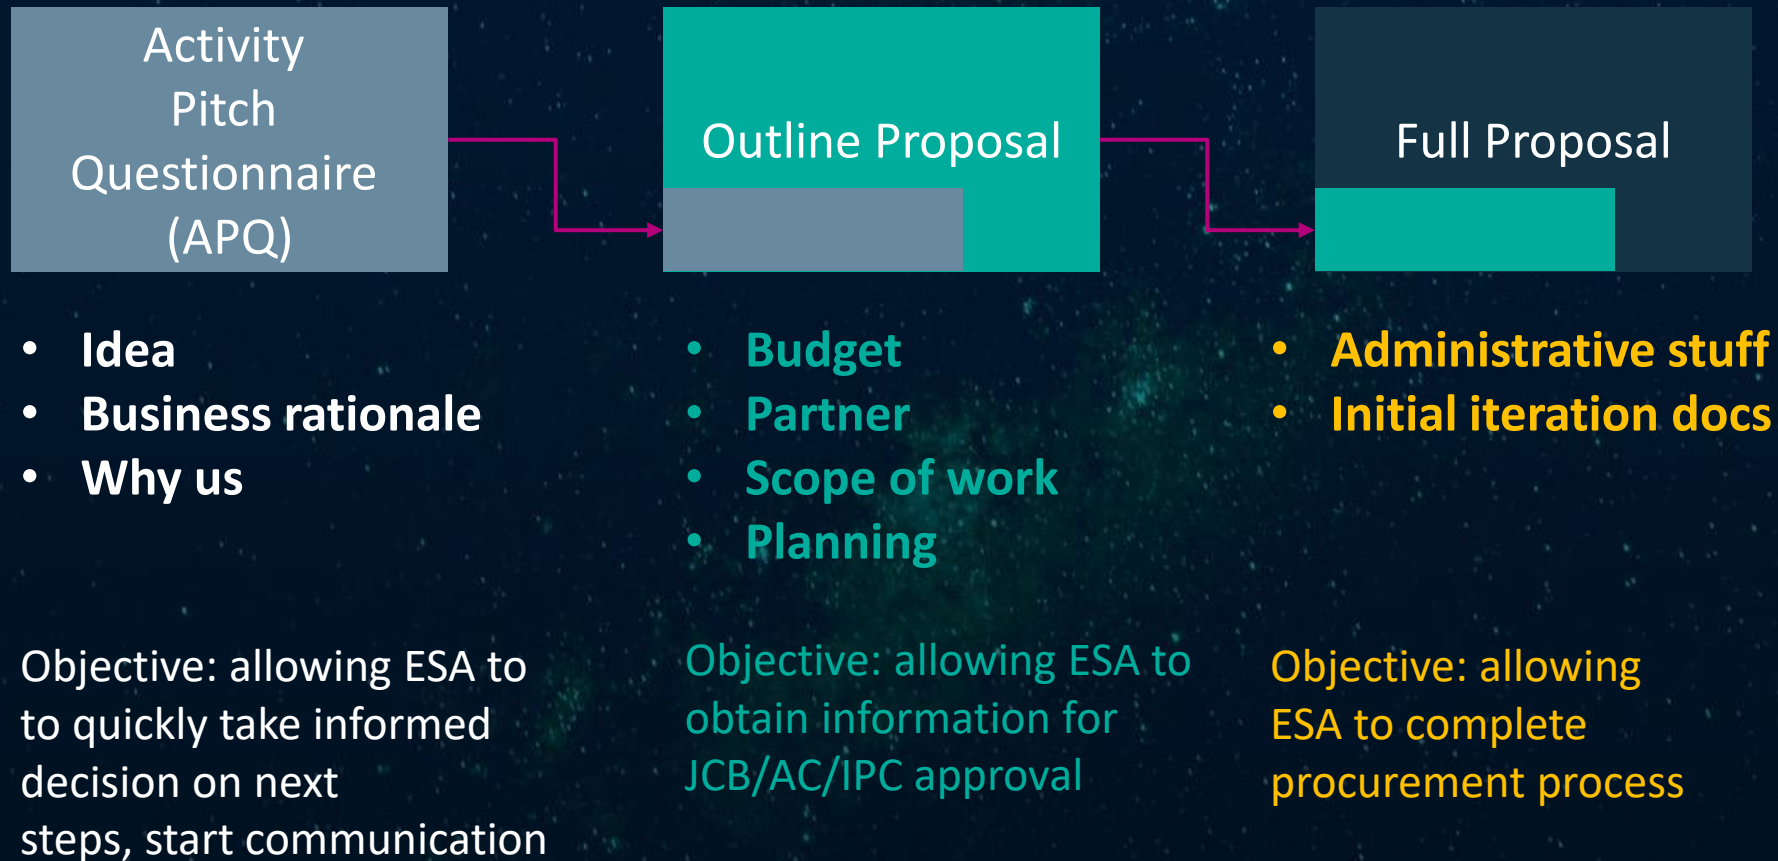

## CURRENT FUNDING OPPORTUNITIES (3)

<https://business.esa.int>

### **Competitive Tenders (50% funded) – Feasibility Studies and Demonstration Projects**

Digital Transformation and Green Economy	(Closes 31/10/2022)
Sustainable Digitally Connected Solutions for the Commodities Crisis	(Closes 31/10/2022)
Space for Green Construction	(Opens 31/10/2022, Closes 28/02/2023)
Satellite Connectivity for Autonomous Land Vehicles Safety	(Opens 30/09/2022, Closes 28/02/2023)
ICT and Electronic Devices Sustainability	(Opens 31/10/2022, Closes 16/01/2023)
Space Applications Supporting Digital Transformation in Public Safety (2)	(Closes 30/06/2023)
Space for Olympic Games	(Closes 31/12/2025)
Space4Rail - Future Control-command, Signalling & Performance,	(Closes 31/12/2025)
Space Systems for Safety and Security (4S) – “SPL”	(Closes 31/12/2025)
CASE: Commercial Applications Enabled by Space Environments	(Closes 31/12/2027)

## The ESA BASS Open Call Application Process

## Project Portfolio

### Isolation Plus

April 2021

- ESA BIC UK alumnus Isolation Plus uses satellite and ground data to produce new insights visualised at a granular mapping level to shine a light on the hidden vulnerable and empower local organisations to reach out to them and provide the support they need.
- The Isolation Plus product combines satellite and ground data to produce data layers that help to identify where the hidden vulnerable are more likely to reside. The single point of access for this information makes it easier for Community Voluntary Organisations (CVOs) and Local Authorities (LAs) to target and tailor their services to the areas most in need.
- <https://business.esa.int/projects/isolation-plus>

## Project Portfolio

### Fusion Platform® - Enhanced agricultural field monitoring services

10<sup>th</sup> August 2021

- This project demonstrates an automated solution that provides different price/performance options to agricultural corporates for weed detection, frost damage detection, yield prediction and biomass estimation based on the imagery, data and algorithms used.
- Users of the Fusion Platform® can opt to purchase APIs or Standard Service Description (SSDs) bundles to: remotely detect frost damage on their chosen areas; identify weeds in their fallow fields; predict yield several months before they harvest and estimate pasture biomass on demand. The user can compare and select the price and performance of these agriculture services dependent upon their needs and budgets throughout their seasons.
- <https://business.esa.int/projects/fusion-platform>

## Project Portfolio

### Augmented Quantum Key Distribution Services

Sept 2021

- An 'Augmented Quantum Key Distribution (AQKD)' satellite service that uses nanosatellites (particularly CubeSats) to deliver cryptographic keys and related services for fractions of the cost of traditional satellite constellations.
- <https://business.esa.int/projects/a-qkd-s>

# SCOTTISH ENTERPRISE

- **SMART:SCOTLAND**

*Supporting feasibility studies for high-risk, ambitious projects.*

*60-70% -£100K max*

- *(APPLYING SPACE DATA TO THE NET ZERO ECONOMY)*

Competition	Innovate UK Smart	EIC Accelerator	Eurostars
Description	Clear game-changing, innovative and/or disruptive and ambitious idea leading to new products, processes or services. Must demonstrate large market.	The EIC Accelerator supports individual Small and Medium Enterprises (SMEs), in particular Startups and spinout companies to develop and scaleup game-changing innovations.	You can apply for Eurostars funding for any sector and industry. It can address any technological area but must be aimed at the development of a new product, process or service.
Technology Readiness Levels	Feasibility (incl. Market Research) and Industrial Research TRLs 3-6 Experimental Development TRLs 6-8	Experimental Development (TRL 5-8)	Projects should go to market 2 years after the project finishes.
Participant requirements	UK SME as a minimum (plus another company if research organisation leads)	Single applicant start up or SME	UK SME + partner from participating country
Type of call	Grant	Grant	Grant
Funding %	Feasibility/Industrial Research 50-70% Experimental Development 25-45% depending on company size	70% grant	60%
Funding amount	£100,000 - £500,000 (single SME or collaborative) £100,000 - £2m (collaborative)	Max of €2.5m	€360k per SME partner
Closing date	26 Oct 2022	5th October 2022 2023??? tbc	Feb/March 2023 tbc

# SUPPORT

## WHO WE WORK WITH

- ✓ SMEs (typically 10-250)
- ✓ In Scottish Enterprise or SOSE region (HIE provides similar support)
- ✓ Market-oriented innovation/ research and development (R&D) project
- ✓ Can evidence a market/customers willing to pay
- ✓ Are confident they will be able to match-fund at least 30% of project costs
- ✓ Willing to share results

# SUPPORT

1. Funding Identification
2. Fit-to-call, including considerations for success.
3. Guidance on proposal writing/Toolkit/other SE resources
4. Proposal review
5. Interview or pitch prep
6. Partnering/ Link to other opportunities\*

# Preparing a Funding Application

## Top 5 Tips

# Conclusions

- There are various opportunities available from a range of funding organisations
- Also support available from e.g. Innovate UK helpdesk, SE advice service, KTN & Enterprise network re partners
- LDS can signpost and provide support to accessing funding and identifying collaborative opportunities
- Calls to action:
  - Get your organisation listed in Scotland's Location Data Directory
  - Share ideas for thematic areas for future events
  - Engage with the community via LinkedIn

*Developing Scotland's Geospatial Community*

Thank you!
